

DN6848/SE/TE/S

**Hall IC (Operating Temperature Range
Topr=−40 to +100°C, Operating in
Alternative Magnetic Field)**

■ Overview

The DN6848/SE/TE/S is a combination of a Hall element, amplifier, Schmitt circuit, and stabilized power supply/temperature compensator integrated on an identical chip by using the IC technology. It amplifies Hall element output at the amplifier, converts into a digital signal through the Schmitt circuit, and drives the TTL or MOS IC directly.

■ Features

- High sensitivity and low drift
- Stable temperature characteristics due to the additional temperature compensator
- Wide operating supply voltage range ($V_{CC}=4.5$ to 16V)
- Operating in alternative magnetic field
- TTL and MOS ICs directly drivable by output
- Output open collector

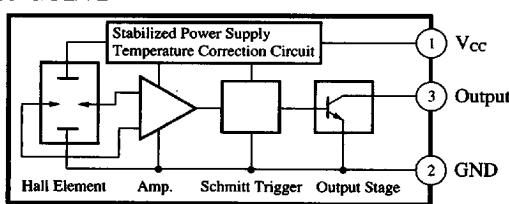

■ Applications

- Speed sensors
- Position sensors
- Rotation sensors
- Keyboard switches
- Microswitches

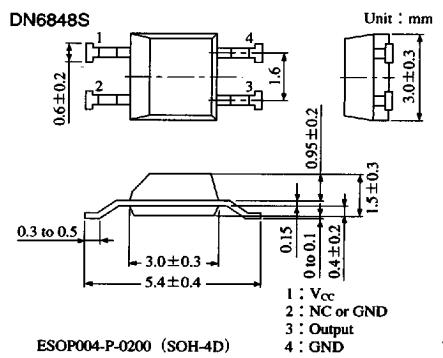

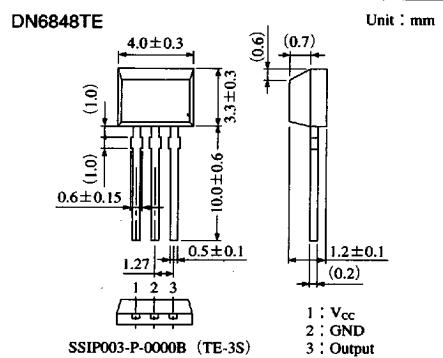

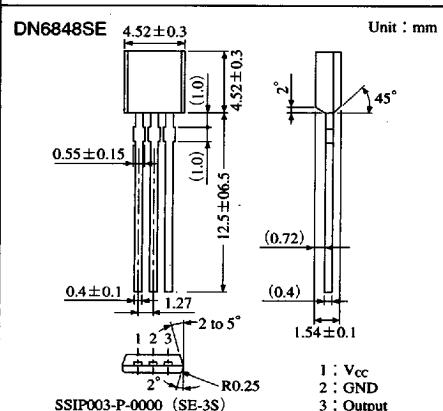

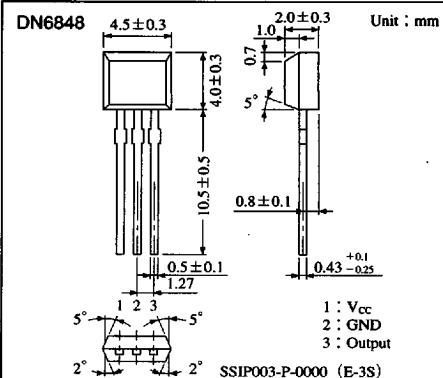

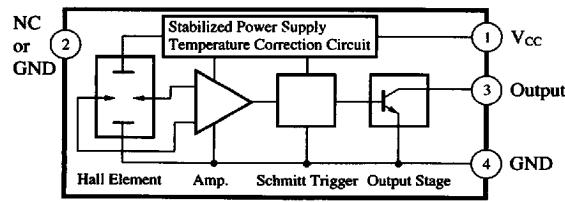

Note) This IC is not suitable for car electrical equipments.

■ Absolute Maximum Ratings (Ta=25°C)

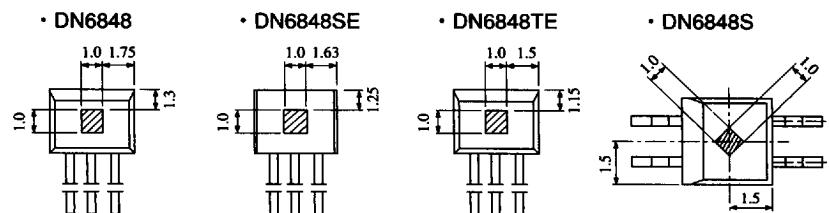

| Parameter | Symbol | Rating | Unit |
|-------------------------------|------------------|-------------|------|
| Supply voltage | V _{CC} | 18 | V |
| Supply current | I _{CC} | 8 | mA |
| Circuit current | I _O | 20 | mA |
| Power dissipation | P _D | 150 | mW |
| Operating ambient temperature | T _{OPR} | -40 to +100 | °C |
| Storage temperature | T _{STG} | -55 to +125 | °C |

■ Electrical Characteristics (Ta=25°C)

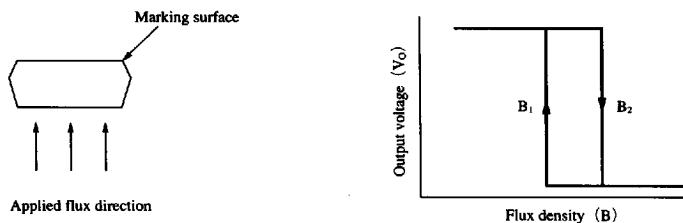

| Parameter | Symbol | Condition | min | typ | max | Unit |
|------------------------|-------------------------|---|-----|-----|-----|------|
| Operating flux density | B ₁ (L to H) | V _{CC} =12V | 0.5 | 9 | 21 | mT |
| | B ₂ (H to L) | V _{CC} =12V | 1.5 | 11 | 22 | mT |
| Hysteresis width | B _W | V _{CC} =12V | 1 | 2 | — | mT |
| Low output voltage | V _{OL} | V _{CC} =16V, I _O =12mA, B=22mT | — | — | 0.4 | V |
| | | V _{CC} =4.5V, I _O =12mA, B=22mT | — | — | 0.4 | V |
| High output current | I _{OH} | V _{CC} =4.5 to 16V V _O =16V, B=0mT | — | — | 10 | μA |
| Supply current | I _{CC} | V _{CC} =16V | — | — | 6 | mA |
| | | V _{CC} =4.5V | — | — | 5.5 | mA |

■ Hall Element Position

Unit : mm
The center of the Hall element is in the hatched area in the right figure.

| Distance from package surface to sensor(mm) | DN6848 | DN6848SE | DN6848TE | DN6848S |
|---|--------|----------|----------|---------|
| | 0.7 | 0.42 | 0.4 | 0.65 |

Panasonic

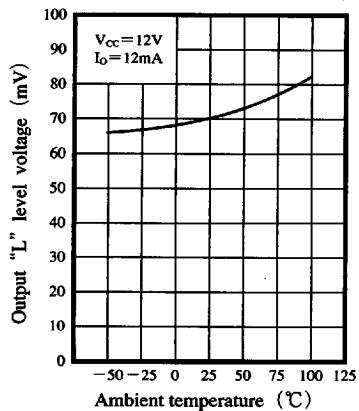

■ Precaution on Use

1. Change of the operation magnetic flux density does not depend on the supply voltage, because the stabilization power supply is built-in. (only for the range ; $V_{CC}=4.5$ to 16V)
2. Change from "H" to "L" level increases the supply current by approx. 1mA.
