Product specification Supersedes data of 2003 May 09 2003 Jun 12

BLF0810-180; BLF0810S-180

180 W LDMOS power transistor for base station

applications at frequencies from 800 to 1000 MHz.

860 to 960 MHz frequency range

• CDMA and multicarrier applications.

· Common source class-AB operation applications in the

APPLICATIONS

DESCRIPTION

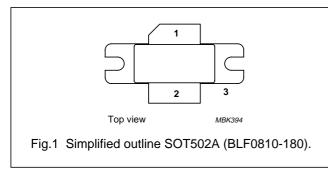

PINNING - SOT502B

FEATURES

- Typical CDMA IS95 performance at standard settings with a supply voltage of 27 V and I_{DQ} of 1130 mA. Adjacent channel bandwidth is 30 kHz, adjacent channel at \pm 750 kHz:
 - Output power = 30 W
 - Gain = 16 dB
 - Efficiency = 27%
 - ACPR = -46 dBc at 750 kHz and BW = 30 kHz
- Easy power control
- Excellent ruggedness
- High power gain
- Excellent thermal stability
- Designed for broadband operation (800 to 1000 MHz)
- Internally matched for ease of use.

PINNING - SOT502A

| PIN | DESCRIPTION |
|-----|-----------------------------|
| 1 | drain |
| 2 | gate |
| 3 | source; connected to flange |

QUICK REFERENCE DATA

Typical RF performance at T_h = 25 °C in a common source test circuit.

| PIN | DESCRIPTION |
|-----|-----------------------------|
| 1 | drain |
| 2 | gate |
| 3 | source; connected to flange |

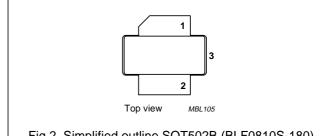

Fig.2 Simplified outline SOT502B (BLF0810S-180).

| MODE OF OPERATION | f (MHz) | V _{DS} (V) | P _L (W) | G _p (dB) | ղ _D (%) | d ₃ (dBc) | ACPR 750 (dBc) |
|-------------------|------------------------------------------------|------------------------|-----------------------|------------------------|-----------------------|-------------------------|-------------------|
| Class-AB (2-tone) | f ₁ = 890.0; f ₂ = 890.1 | 27 | 140 (PEP) | 16 | 39 | -28 | - |
| CDMA (IS95) | 890 | 27 | 30 (AV) | 16 | 27 | - | -46 |

BLF0810-180; BLF0810S-180

LIMITING VALUES

In accordance with the Absolute Maximum Rating System (IEC 60134).

| SYMBOL | PARAMETER | MIN. | MAX. | UNIT |
|------------------|----------------------|------|------|------|
| V _{DS} | drain-source voltage | _ | 75 | V |
| V _{GS} | gate-source voltage | - | ±15 | V |
| T _{stg} | storage temperature | -65 | +150 | С |
| Tj | junction temperature | - | 200 | °C |

THERMAL CHARACTERISTICS

| SYMBOL | PARAMETER | CONDITIONS | VALUE | UNIT |
|----------------------|----------------------------------------------|-----------------------------------------------------|-------|------|
| R _{th j-c} | thermal resistance from junction to case | $T_h = 25 \ ^\circ C$, $P_L = 35 \ W$ (AV), note 1 | 0.42 | K/W |
| R _{th j-hs} | thermal resistance from heatsink to junction | $T_h = 25 \ ^\circ C, P_L = 35 \ W (AV), note 2$ | 0.62 | K/W |

Notes

1. Thermal resistance is determined under RF operating conditions.

2. Depending on mounting condition in application.

CHARACTERISTICS

 $T_i = 25 \ ^{\circ}C$ unless otherwise specified.

| SYMBOL | PARAMETER | CONDITIONS | MIN. | TYP. | MAX. | UNIT |
|----------------------|----------------------------------|-------------------------------------------------|------|------|------|------|
| V _{(BR)DSS} | drain-source breakdown voltage | $V_{GS} = 0; I_D = 3 \text{ mA}$ | 75 | - | - | V |
| V _{GSth} | gate-source threshold voltage | V _{DS} = 10 V; I _D = 300 mA | 4 | - | 5 | V |
| I _{DSS} | drain-source leakage current | V _{GS} = 0; V _{DS} = 36 V | - | - | 3 | μA |
| I _{DSX} | on-state drain current | $V_{GS} = V_{GSth} + 9 V; V_{DS} = 10 V$ | 45 | - | - | A |
| I _{GSS} | gate leakage current | $V_{GS} = \pm 20 \text{ V}; V_{DS} = 0$ | - | - | 1 | μA |
| g _{fs} | forward transconductance | V _{DS} = 10 V; I _D = 10 A | - | 9 | - | S |
| R _{DSon} | drain-source on-state resistance | V _{GS} = 9 V; I _D = 10 A | - | 60 | - | mΩ |

BLF0810-180; BLF0810S-180

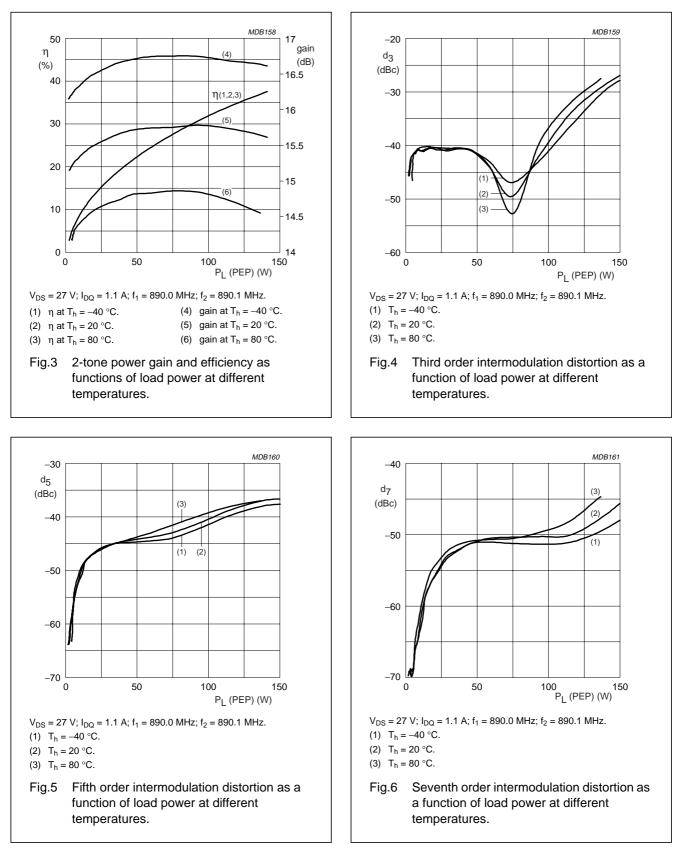

APPLICATION INFORMATION

RF performance in a common source class-AB circuit.

 V_{DS} = 27 V; I_{DQ} = 1130 mA; f = 890 MHz; T_{h} = 25 °C; unless otherwise specified.

| SYMBOL | PARAMETER | CONDITIONS | MIN. | TYP. | MAX. | UNIT |

DATA SHEET STATUS

| LEVEL | DATA SHEET STATUS ⁽¹⁾ | PRODUCT STATUS ⁽²⁾⁽³⁾ | DEFINITION |
|-------|-------------------------------------|-------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| I | Objective data | Development | This data sheet contains data from the objective specification for product development. Philips Semiconductors reserves the right to change the specification in any manner without notice. |
| 11 | Preliminary data | Qualification | This data sheet contains data from the preliminary specification. Supplementary data will be published at a later date. Philips Semiconductors reserves the right to change the specification without notice, in order to improve the design and supply the best possible product. |
| | Product data | Production | This data sheet contains data from the product specification. Philips Semiconductors reserves the right to make changes at any time in order to improve the design, manufacturing and supply. Relevant changes will be communicated via a Customer Product/Process Change Notification (CPCN). |

Notes

- 1. Please consult the most recently issued data sheet before initiating or completing a design.
- 2. The product status of the device(s) described in this data sheet may have changed since this data sheet was published. The latest information is available on the Internet at URL http://www.semiconductors.philips.com.
- 3. For data sheets describing multiple type numbers, the highest-level product status determines the data sheet status.

DEFINITIONS

Short-form specification — The data in a short-form specification is extracted from a full data sheet with the same type number and title. For detailed information see the relevant data sheet or data handbook.

Limiting values definition — Limiting values given are in accordance with the Absolute Maximum Rating System (IEC 60134). Stress above one or more of the limiting values may cause permanent damage to the device. These are stress ratings only and operation of the device at these or at any other conditions above those given in the Characteristics sections of the specification is not implied. Exposure to limiting values for extended periods may affect device reliability.

Application information — Applications that are described herein for any of these products are for illustrative purposes only. Philips Semiconductors make no representation or warranty that such applications will be suitable for the specified use without further testing or modification.

DISCLAIMERS

Life support applications — These products are not designed for use in life support appliances, devices, or systems where malfunction of these products can reasonably be expected to result in personal injury. Philips Semiconductors customers using or selling these products for use in such applications do so at their own risk and agree to fully indemnify Philips Semiconductors for any damages resulting from such application.

Right to make changes — Philips Semiconductors reserves the right to make changes in the products including circuits, standard cells, and/or software described or contained herein in order to improve design and/or performance. When the product is in full production (status 'Production'), relevant changes will be communicated via a Customer Product/Process Change Notification (CPCN). Philips Semiconductors assumes no responsibility or liability for the use of any of these products, conveys no licence or title under any patent, copyright, or mask work right to these products, and makes no representations or warranties that these products are free from patent, copyright, or mask work right infringement, unless otherwise specified.
