Description

M-Pulse's MP4TD0870 is a high performance silicon bipolar MMIC housed in a hermetic high reliability package. The MP4TD0870 is useful where a general purpose 50Ω gain block with low (3.2 dB typical) noise figure is required. Typical applications include narrow and wide band IF and RF amplifiers in industrial and military applications.

The MP4TD0870 is fabricated using a 10 GHz f_T silicon bipolar technology that features gold metalization and IC passivation for increased performance and reliability.
