

ACT533SMX-2

The **ACT533SMX-2** is a 2 pad, high quality, cost competitive ceramic packaged, glass sealed crystal. The package provides for the durability and reliability, necessary for strenuous processes like infrared and vapour reflow. The pads are gold plated. The device is very suitable for automatic placement on PCB's. With an excellent range of Fundamental Frequencies (To 54.0MHz) allowing for ease of circuit design, and with a good range of stabilities it has become one of the optimum choices for design engineers. Applications include Microprocessor Systems, Instrumentation, Office Automation, Audio Visual and many more. (Available loose, or on 1,000pc reels to assist with varying volume requirements.)

Compatible with Eu Directive
 2002/95/EC - RoHS
 Contains Pb in sealing glass
 exempted from Article 4(1)
 of the directive
