APPLICATION

· I/O ESD protection for mobile handsets, notebook, PDAs, etc.
· EMI filtering for data ports in cell phones, PDAs, notebook computers
· EMI filtering for LCD, camera and chip-to-chip data lines

FEATURES

· EMI/RFI filtering
· ESD Protection to IEC 61000-4-2 Level 4
· Low insertion loss
· Good attenuation of high frequency signals
· Low clamping voltage
· Low operating and leakage current
· Six elements in one package

DESCRIPTION

PV1015UDF12B is an EMI filter array with electrostatic discharge (ESD) protection, which integrates six pi filters (C-R-C). These parts include ESD protection diodes on every pin, providing a very high level of protection for sensitive electronic components that may be subjected to electrostatic discharge.

The PV1015UDF12B provides the recommended line termination while implementing a low pass filter to limit EMI levels and providing ESD protection which exceeds IEC 61000-4-2 level 4 standard. The UDFN package is a very effective PCB space occupation and a very thin package (0.4mm Pitch, 0.5mm height)
