

8021-2 : DING-DONG SOUND EFFECT GENERATOR IC

General Description

The 8021-2 is a ding-dong sound effect generator IC produced by LSI CMOS technology. With built-in RC oscillator and digital envelope circuits, minimal external components are required. This IC simulates the mechanical ding-dong sound, and is ideal for door bell application.

Features

- 1.3V to 3.3V operating voltage and low power consumption
- One-shot mode of 2 ding-dong playing sequences
- Standard TO-92 package form
- Dynamic speaker can be driven with external NPN transistor

Absolute Maximum Ratings

DC Supply Voltage -0.3V to +5.0V
Operating Ambient Temperature -10°C to 60°C
Storage Temperature -55°C to 125°C

Electrical Characteristics

(V_{ss}=0V, V_{dd}=1.5V, T_a=25°C, unless otherwise specified.)

Parameter	Symbol	Min.	Typ.	Max.	Conditions
Operating voltage	V _{dd}	1.3V	1.5V	3.3V	
Current stand-by operating	I _s	-	-	0.5μA	All terminal open
	I _{dd}	-	-	0.5mA	1mA
Osc. frequency	F _{osc}	102kHz	120kHz	144kHz	

Pin assignment of TO-92 package form

Application Circuit

Switch (normally closed type)

REV.9-98
