REFERENCE DATA

1. Load current vs. ambient temperature
Use load current within range specified in the figure below.

Tested condition:

- (1) With external heat sink
 - 1) (a) 10 A, 15A, 20 A type
 - A heat sink; optional heat sink (AQP801) or a 150×150×3.2 mm aluminum sheet (painted black)
 - (b) 30 A, 40 A type
 - Shown with standard heat sink (AQP804)
- 2) If attached to a heat sink, use a heat-conductive compound or similar coating to improve cooling.
- (2) Without external heat sink
 - If the mounting surface is not metallic and a heat sink is not used, expose the bottom surface and plate surface to improve heat dissipation.

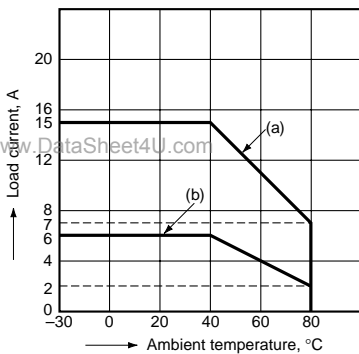

The graphs show the characteristics when the relay is mounted as shown in the right figure.
