

# Ultra-Small, Rail-to-Rail I/O with Disable, Single-/Dual-Supply, Low-Power Op Amps

## General Description

The MAX4245/MAX4246/MAX4247 family of low-cost op amps offer rail-to-rail inputs and outputs, draw only 320 $\mu$ A of quiescent current, and operate from a single +2.5V to +5.5V supply. For additional power conservation, the MAX4245/MAX4247 offer a low-power shutdown mode that reduces supply current to 50nA, and puts the amplifiers' outputs in a high-impedance state. These devices are unity-gain stable with a 1MHz gain-bandwidth product driving capacitive loads up to 470pF.

The MAX4245/MAX4246/MAX4247 family is specified from -40°C to +125°C, making them suitable for use in a variety of harsh environments, such as automotive applications. The MAX4245 single amplifier is available in ultra-small 6-pin SC70 and space-saving 6-pin SOT23 packages. The MAX4246 dual amplifier is available in 8-pin SOT23, SO, and  $\mu$ MAX<sup>®</sup> packages. The MAX4247 dual amplifier comes in a tiny 10-pin  $\mu$ MAX package.

## Applications

Portable Communications  
Single-Supply Zero-Crossing Detectors  
Instruments and Terminals  
Electronic Ignition Modules  
Infrared Receivers  
Sensor-Signal Detection

## Selector Guide

PART	AMPLIFIERS PER PACKAGE	SHUTDOWN MODE
MAX4245AXT-T	1	Yes
MAX4245AUT-T	1	Yes
MAX4246AKA-T	2	No
MAX4246ASA	2	No
MAX4246AUA	2	No
MAX4247AUB	2	Yes

$\mu$ MAX is a registered trademark of Maxim Integrated Products, Inc.

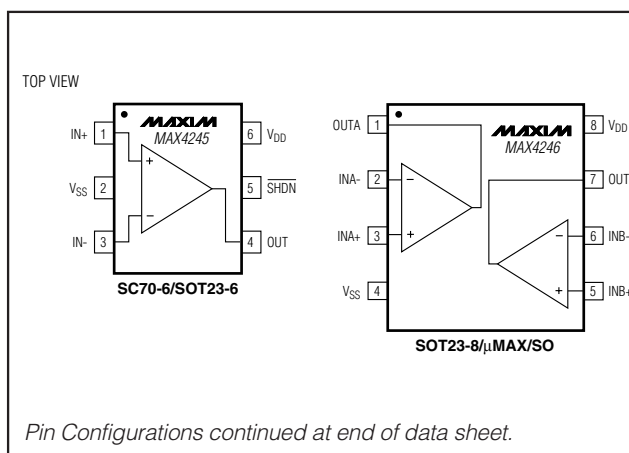

## Features

- ◆ Rail-to-Rail Input and Output Voltage Swing
- ◆ 50nA (max) Shutdown Mode (MAX4245/MAX4247)
- ◆ 320 $\mu$ A (typ) Quiescent Current Per Amplifier
- ◆ Single +2.5V to +5.5V Supply Voltage Range
- ◆ 110dB Open-Loop Gain with 2k $\Omega$  Load
- ◆ 0.01% THD with 100k $\Omega$  Load
- ◆ Unity-Gain Stable up to C<sub>LOAD</sub> = 470pF
- ◆ No Phase Inversion for Overdriven Inputs
- ◆ Available in Space-Saving Packages
  - 6-Pin SC70 or 6-Pin SOT23 (MAX4245)
  - 8-Pin SOT23/SO or 8-Pin  $\mu$ MAX (MAX4246)
  - 10-Pin  $\mu$ MAX (MAX4247)

Stresses beyond those listed under "Absolute Maximum Ratings" may cause permanent damage to the device. These are stress ratings only, and functional operation of the device at these or any other conditions beyond those indicated in the operational sections of the specifications is not implied. Exposure to absolute maximum rating conditions for extended periods may affect device reliability.

## Detailed Description

### Rail-to-Rail Input Stage

The MAX4245/MAX4246/MAX4247 have rail-to-rail input and output stages that are specifically designed for low-voltage, single-supply operation. The input stage consists of composite NPN and PNP differential stages, which operate together to provide a common-mode range extending to both supply rails. The crossover region of these two pairs occurs halfway between V<sub>DD</sub> and V<sub>SS</sub>. The input offset voltage is typically  $\pm 400\mu\text{V}$ . Low-operating supply voltage, low supply current and rail-to-rail outputs make this family of operational amplifiers an excellent choice for precision or general-purpose, low-voltage, battery-powered systems.

Since the input stage consists of NPN and PNP pairs, the input bias current changes polarity as the common-

mode voltage passes through the crossover region. Match the effective impedance seen by each input to reduce the offset error caused by input bias currents flowing through external source impedance (Figures 1a and 1b).

The combination of high-source impedance plus input capacitance (amplifier input capacitance plus stray capacitance) creates a parasitic pole that can produce an underdamped signal response. Reducing input capacitance or placing a small capacitor across the feedback resistor improves response in this case.

The MAX4245/MAX4246/MAX4247 family's inputs are protected from large differential input voltages by internal  $5.3\text{k}\Omega$  series resistors and back-to-back triple-diode stacks across the inputs (Figure 2). For differential-input voltages much less than 2.1V (triple-diode drop),

# Ultra-Small, Rail-to-Rail I/O with Disable, Single-/Dual-Supply, Low-Power Op Amps

Figure 2. Input Protection Circuit

input resistance is typically  $4M\Omega$ . For differential voltages greater than 2.1V, input resistance is around  $10.6k\Omega$ , and the input bias current can be approximated by the following equation:

$$I_B = (V_{DIFF} - 2.1V) / 10.6k\Omega$$

In the region where the differential input voltage approaches 2.1V, the input resistance decreases exponentially from  $4M\Omega$  to  $10.6k\Omega$  as the diodes begin to conduct. It follows that the bias current increases with the same curve.

In unity-gain configuration, high slew-rate input signals may capacitively couple to the output through the triple-diode stacks.

### Rail-to-Rail Output Stage

The MAX4245/MAX4246/MAX4247 can drive a  $2k\Omega$  load and still typically swing within 35mV of the supply rails. Figure 3 shows the output voltage swing of the MAX4245 configured with  $A_V = -1V/V$ .

## Applications Information

### Power-Supply Considerations

The MAX4245/MAX4246/MAX4247 operate from a single +2.5V to +5.5V supply (or dual  $\pm 1.25V$  to  $\pm 2.75V$  supplies) and consume only  $320\mu A$  of supply current per amplifier. A 90dB power-supply rejection ratio allows the amplifiers to be powered directly off a decaying battery voltage, simplifying design and extending battery life.

### Power-Up

The MAX4245/MAX4246/MAX4247 output typically settles within  $4\mu s$  after power-up. Figure 4 shows the output voltage on power-up and power-down.

### Shutdown Mode

The MAX4245/MAX4247 feature a low-power shutdown mode. When  $\overline{SHDN}$  is pulled low, the supply current drops to 50nA per amplifier, the amplifier is disabled, and the output enters a high-impedance state. Pulling

Figure 3. Rail-to-Rail Input/Output Voltage Range

Figure 4. Power-Up/Power-Down Waveform

$\overline{SHDN}$  high enables the amplifier. Figure 5 shows the MAX4245/MAX4247's shutdown waveform.

Due to the output leakage currents of three-state devices and the small internal pullup current for  $\overline{SHDN}$ , do not let the  $\overline{SHDN}$  float. Floating  $\overline{SHDN}$  may result in indeterminate logic levels, and could adversely affect op amp operation. The logic threshold for  $\overline{SHDN}$  is referred to  $V_{SS}$ . When using dual supplies, pull  $\overline{SHDN}$  to  $V_{SS}$ , not GND, to shut down the op amp.

### Driving Capacitive Loads

The MAX4245/MAX4246/MAX4247 are unity-gain stable for loads up to  $470pF$ . Applications that require greater capacitive drive capability should use an isolation resistor between the output and the capacitive load

# Ultra-Small, Rail-to-Rail I/O with Disable, Single-/Dual-Supply, Low-Power Op Amps

MAX4245/MAX4246/MAX4247

Figure 5. Shutdown Waveform

(Figures 6a, 6b, 6c). Note that this alternative results in a loss of gain accuracy because  $R_{ISO}$  forms a voltage divider with the  $R_{LOAD}$ .

### Power-Supply Bypassing and Layout

The MAX4245/MAX4246/MAX4247 family operates from either a single +2.5V to +5.5V supply or dual  $\pm 1.25V$  to  $\pm 2.75V$  supplies. For single-supply operation, bypass the power supply with a 100nF capacitor to  $V_{SS}$  (in this case GND). For dual-supply operation, both the  $V_{DD}$  and the  $V_{SS}$  supplies should be bypassed to ground with separate 100nF capacitors.

Good PC board layout techniques optimize performance by decreasing the amount of stray capacitance at the op amp's inputs and output. To decrease stray capacitance, minimize trace lengths and widths by placing external components as close to the device as possible. Use surface-mount components when possible.

### Part Number Table

**Notes:**

1. See the [MAX4246 QuickView Data Sheet](#) for further information on this product family or download the [MAX4246 full data sheet](#) (PDF, 544kB).
2. Other options and links for purchasing parts are listed at: <http://www.maxim-ic.com/sales>.
3. [Didn't Find What You Need?](#) Ask our applications engineers. Expert assistance in finding parts, usually within one business day.
4. Part number suffixes: T or T&R = tape and reel; + = RoHS/lead-free; # = RoHS/lead-exempt. More: See [full data sheet](#) or [Part Naming Conventions](#).
5. \* Some packages have variations, listed on the drawing. "PkgCode/Variation" tells which variation the product uses.

Part Number	Free Sample	Buy Direct	Package: TYPE PINS SIZE DRAWING CODE/VAR *	Temp	RoHS/Lead-Free? Materials Analysis
MAX4246ASA+T			SOIC ;8 pin;.150" Dwg: <a href="#">21-0041B</a> (PDF) Use pkgcode/variation: S8+4*	-40C to +85C	RoHS/Lead-Free: <a href="#">Yes</a> <a href="#">Materials Analysis</a>
MAX4246ASA+			SOIC ;8 pin;.150" Dwg: <a href="#">21-0041B</a> (PDF) Use pkgcode/variation: S8+4*	-40C to +85C	RoHS/Lead-Free: <a href="#">Yes</a> <a href="#">Materials Analysis</a>
MAX4246AKA			SOT-23;8 pin; Dwg: <a href="#">21-0078F</a> (PDF) Use pkgcode/variation: K8-5*	-40C to +85C	RoHS/Lead-Free: <a href="#">No</a> <a href="#">Materials Analysis</a>
MAX4246AKA+			SOT-23;8 pin; Dwg: <a href="#">21-0078F</a> (PDF) Use pkgcode/variation: K8+5*	-40C to +85C	RoHS/Lead-Free: <a href="#">Yes</a> <a href="#">Materials Analysis</a>
MAX4246AKA-T			SOT-23;8 pin; Dwg: <a href="#">21-0078F</a> (PDF) Use pkgcode/variation: K8-5*	-40C to +85C	RoHS/Lead-Free: <a href="#">No</a> <a href="#">Materials Analysis</a>
MAX4246AKA+T			SOT-23;8 pin; Dwg: <a href="#">21-0078F</a> (PDF) Use pkgcode/variation: K8+5*	-40C to +85C	RoHS/Lead-Free: <a href="#">Yes</a> <a href="#">Materials Analysis</a>
MAX4246AUA+			uMAX;8 pin;3 x 3mm Dwg: <a href="#">21-0036J</a> (PDF) Use pkgcode/variation: U8+1*	-40C to +85C	RoHS/Lead-Free: <a href="#">Yes</a> <a href="#">Materials Analysis</a>

MAX4246AUA-T			uMAX;8 pin;3 x 3mm Dwg: <a href="#">21-0036J</a> (PDF) Use pkgcode/variation: U8-1*	-40C to +85C	RoHS/Lead-Free: <a href="#">No Materials Analysis</a>
MAX4246AUA			uMAX;8 pin;3 x 3mm Dwg: <a href="#">21-0036J</a> (PDF) Use pkgcode/variation: U8-1*	-40C to +85C	RoHS/Lead-Free: <a href="#">No Materials Analysis</a>
MAX4246AUA+T			uMAX;8 pin;3 x 3mm Dwg: <a href="#">21-0036J</a> (PDF) Use pkgcode/variation: U8+1*	-40C to +85C	RoHS/Lead-Free: <a href="#">Yes Materials Analysis</a>
