

One-touch / Screw Mating Compatible Circular Waterproof Connector

JL10 Series

CONNECTOR MB-0263-2 April 2016

The JL10 Series are TUV approved and UL recognized, one-touch locking, circular, waterproof connectors for industrial machinery, satisfying European safety standards.

The adopted one-touch lock mechanism has a superior mating and unmating operability and the product contributes to mating function ease. The JL10 receptacle offers a hybrid one-touch lock and threaded dual function mating. The connector offers mating compatibility with conventional MIL standard MS connectors and with our screw mating plugs (JL04V, N/MS, JA).

Applications

Industrial machineries, servo motors, robots, semiconductor-fabrication equipment, communication devices, measuring devices, broadcasting equipment and more.

Features

- ■Adopts a one-touch bayonet lock style mating allows secure mating even in narrow operating spaces or areas with poor visibility.
 - Superior connector operability improves mating and unmating function (reduced screw-down fastening, and eliminating torque control).
- ■JL10 Receptacle is an one-touch / screw mating hybrid type.
- One-touch mating: When mated with JL10 plug
- Screw mating: MIL-standard MS connector and our standard N/MS-A/B Series, JL04V Series, JA*A Series using J1 type plug.
- With guide mark (color: white) on JL10 Series receptacle and plug, mating assurance can be confirmed by sight.
- Low-profile compact design, and direction of the cable leader of angled type can be set in arbitrary 8 orientation in 45 degrees increments.
- Same cable clamp as used for JL04V.
- ■UL recognized and TÜV approved product.
- ■IP67 waterproof and dustproof as a mated pair and individually of the receptacle.
- Superior environmental performance against vibration and oil.

Line-up and Combinations

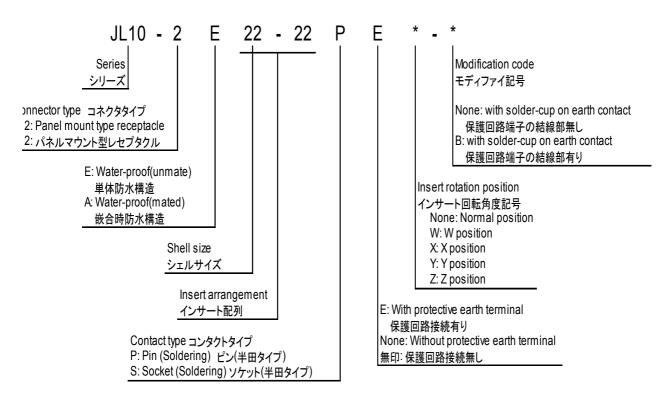

Note 1) Please contact us or conduit manufacturer when for the use of a conduit. Note 2) Please refer to individual catalogs for consideration of JL04V Series, N/MS-A/B Series, and J1 type JA*A Series.

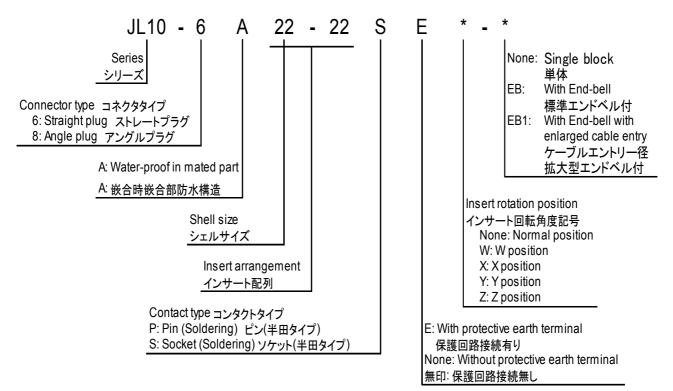

Note 3) Becomes non-waterproof when assembled with N/MS-A/B type plug.

Panel Mount Dimensions for Reference

- (1) Front mount: Receptacle is attached to the front side of the panel and enclosure. Cable termination side will be inside when attached.
- (2) Rear mount: Receptacle is attached to the back side of the panel and enclosure.

 Please be aware of the panel thickness when concerning this product.
 - * Mounting dimensions are the same as our JL04V Series.

Accessory: Gasket (Sold separately)

There is a gasket to prevent water immersion from the panel hole (main body) of the enclosure when receptacle is mounted to the panel (enclosure). The gaskets are the same as ones used for our JL04V Series.

Note 1) Beside the use of a gasket, there is a need for countermeasure to prevent water immersion from the screw holes. Each user to prepare countermeasure.

Cautions

<<JL10 Caution 1>>

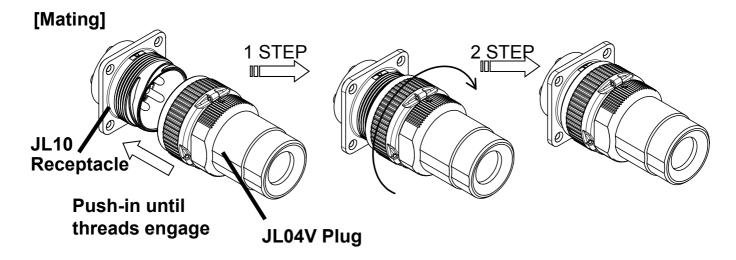

Please note that JL10 plug will not mate with JL04V receptacle.

	Receptacle	Plug	Mating
Combinations	JL04V	JL10	Unmatable
	JL04V	JL04V	Matable
	JL10	JL04V	Matable
	JL10	JL10	Matable

<< JL10 Caution 2>>

When using JL10 receptacle and JL04 plug mating and unmating operation will be the two steps as shown below.

lemo			

Notice:

- 1. The values specified in this brochure are only for reference. The products and their specifications are subject to change without notice. Contact our sales staff for further information before considering or ordering any of our products. For purchase, a product specification must be agreed upon.
- 2. Users are requested to provide protection circuits and redundancy circuits to ensure safety of the equipment, and sufficiently review the suitability of JAE's products to the equipment.

3. The products presented in this brochure are designed for the uses recommended below. We strongly suggest you contact our sales staff when considering use of any of the products in any other way than the recommended applications or for a specific use that requires an extremely high reliability.

- (1) Applications that require consultation:(i) Please contact us if you are considering use involving a quality assurance program that you specify or that is peculiar to the industry, such as:

Automotive electrical components, train control, telecommunications devices (mainline), traffic light control, electric power, combustion control, fire prevention or security systems, disaster prevention equipment, etc.

(ii) We may separately give you our support with a quality assurance program that

you specify, when you think of a use such as:

Aviation or space equipment, submarine repeaters, nuclear power control systems, medical equipment for life support, etc.

(2) Recommended applications include:

Computers, office appliances, telecommunications devices (terminals, mobile units), measuring equipment, audiovisual equipment, home electric appliances, factory automation equipment, etc.
