

The **SM08010-42** is a solid state GaAs FET amplifier designed for the Cellular/Global Standard for Mobile (GSM) market. This amplifier operates from 800 – 1000 MHz, provides 50 dB of gain, ± 0.5 dB gain flatness over the full band, and +42 dBm of output power at its 1 dB compression point. The output third order intercept point is +52 dBm. Its compact size and high linearity make it ideally suited for systems using CDMA or TDMA standards.
